

iphone/ipad/ipod VPN Connection

Open "App Store", search and download "Open VPN Connect" app.

Using your Mac or PC download the [configuration file](#) and [certificate](#) files.

- **To transfer the files to your iphone/ipad/ipod using itunes do the following:**
 1. Connect your iphone/ipad/ipod with Mac or PC and open itunes
 2. Select Device Icon
 3. Open apps
 4. On the bottom of your screen you will see File Sharing and the OpenVPN Application
 5. Select OpenVPN, Click Add and transfer both configuration and certificate files.
- **To upload the configurations file/s into OpenVPN Connect, you can also upload them to a cloud storage service such as dropbox or email them to yourself.**
 1. To use dropbox, upload the config file/s to your dropbox account. On the iPhone, open Dropbox and select a config file. Click on the share icon (square with an arrow pointing up) in the top right corner. Tap on the Open in icon and then tap Copy to OpenVPN.
 2. To email, send the config file/s to an email address that is accessible on your device. Open the email and tap the icon of the configuration file in your email. Choose the option Copy to OpenVPN

Tap the green "+" button from within the OpenVPN Connect app to add the server (configuration file)
